

## Information Digital Printing

Our partner in Portugal prints designs corresponding to your file (JPG, PDF or TIF). The templates can be prepared for cutting or laid out over the entire surface. The printing prices are calculated individually.

The digital printer ALLEGRO from Kornit prints in single process without any pre- or post-treatment all silk fabrics of our assortment.

With this one-step technology, this printer does not use a single drop of water. The high water consumption and the resulting wastewater are the environmentally problematic factors when printing with conventional inkjet printers. The ink is GOTS approved and OEKOTEX100 certified.

**This printing process at BLUR is for light originals  
suitable for medium to heavy silk qualities!**

For dark and full-length graphics and prints on light silk fabrics, please contact [SARA INK](mailto:silvia@saraink.it) in Italy: [silvia@saraink.it](mailto:silvia@saraink.it). The printing house is GOTS certified and will gladly make you an offer. Minimum order is 30 m!

The process for yardage is as follows:

- Contact the printing company
- Order your test print fabric at Seidentraum
- Send the print file to SARA INK or BLUR
- Then you discuss all the printing issues with the printer (in English)
- Buy the fabric in our shop (plus 1 m extra)
- We send the fabric to the printing company
- The invoice for printing you will get by the printing company. They ship your fabric at your studio.

Happy printing!
