

Seidentraum introduces itself

Seidentraum was founded in 2011 in Leipzig. Owner is Dr. Matias Langer, long-time managing director in the field of natural textiles and natural products, geographer and Waldorf teacher.

Seidentraum's offer includes natural textiles made from organic silk and Peace Silk from sustainable and ecological production. The main focus of our product range is on fabrics (by the meter), yarns, fibres and clothing for ladies and babies.

Our Philosophy

The rise of mass fashion is largely responsible for the destruction of the environment and social conditions in many parts of our world. Seidentraum is committed to a change in textile production that respects nature and man. It's the only way to keep our earth and the fashion industry alive.

We support our partners in India in changing social conditions. The artisanal production of silk yarns and fabrics takes place with the involvement of disadvantaged women's groups in the villages and we actively help to ensure that children can attend school in Jharkhand.

We are committed to transforming the fashion industry - away from cheap and unhealthy disposable clothing that lasts only a few months - to durable, sustainable yet fashionable textiles made by skilled craftsmen.

We are committed to driving consumer awareness, exploring the conditions under which their garments are made, and demonstrating the benefits of sustainable, healthy and fair textiles.

*Be yourself the change,
you wish for this world.*
(after Mahatma Gandhi)

Peace Silk is the loveliest way to wear silk!

We trade exclusively with Peace Silk! Peace Silk means: The silkworm can complete its metamorphosis and fly as a beautiful butterfly out of the cocoon. No animal suffers from the production of silk clothing and other wonderful textiles. No silkworm dies during the usual drying of the cocoons by hot steam or boiling water. Our Peace Silk (Ahimsa Silk, non-violent silk) is manufactured under strict social and environmental standards and is mostly certified to the Global Organic Textile Standard (GOTS). This guarantees the highest possible standard for ecological and social sustainability.

Our range

The sustainable organic silk fabrics are available in a variety of qualities, from the light sheer chiffon to the hard-falling wild silk fabric. The yard goods are available undyed from stock. We are happy to fulfill the dyeing on customer request in an OEKOTEX100 certified German dyeing mill. Our partner for digital printing prints your design on every silk fabric - environmentally friendly without a single drop of water - with GOTS-approved ink.

Seidentraum sees itself as a partner for eco-fashion designers, environmentally conscious fashion designers, creative tailors and textile artists. The online shop www.seidentraum.biz is open to both consumers and B2B customers.

Our quality

Silk is called the queen among natural fibres. Silk combines many ideal properties: it is light and comfortable to wear and has excellent skin compatibility. Silk protects from heat in summer and from cold in winter. Clothing made of silk also has the great advantage over synthetic fibres of acting odor-resistant and extremely durable.

Our fabrics are woven from yarns derived from organic silk cultivation of tussah, eri, mulberry or muga silk spinners. Our partners in India and Cambodia are certified craft businesses. From Meghalaya we purchase 100% hand-woven organic silk fabrics from eri silk directly from the weavers. This project by Seidentraum together with GIZ enables women in North-Eastern India to earn an income despite climate change.

Sustainability and social responsibility

- We support students through discounts and sponsorship
- We work together with the local crafts for the packaging
- At [GLS](#) Bank, our money is managed sensibly and responsibly
- We send carbon neutral with DHL GoGreen and DPD totalzero
- We look for suppliers in the region for the operational needs
- We use recyclable or recycled packaging
- Our promotional material is printed on recycled paper
- Out of our socket Green Energy by the citizen's own Elektrizitätswerke Schönau ([EWS](#))
- As a gas supplier we have chosen [POLARSTERN](#) with 100% biogas
- Our websites are CO₂ free hosted by STRATO in Germany
- We realize our mobility by public transport
- We use the carsharing of teilauto Leipzig
