

Seidentraum introduces itself

Seidentraum was founded in 2011 in Leipzig. Owner is Dr. Matias Langer, long-time managing director in the field of natural textiles and natural products, geographer and Waldorf teacher.

Seidentraum's offer includes natural textiles made from organic silk and Peace Silk from sustainable and ecological production. The main focus of our product range is on fabrics (by the meter), yarns, fibres and clothing for ladies and babies.

Peace Silk is the loveliest way to wear silk!

Out of awe of any kind of life, we support non-violent silk breeding and production. It makes it possible to complete the metamorphosis of the silkworm into a butterfly so that no animal has to suffer or die for fashion.

Peace Silk (non-violent silk, Ahimsa Silk) is manufactured under stringent social and environmental standards in India and is predominant certified according to the Global Organic Textile Standard (GOTS).

Our range

The sustainable organic silk fabrics are available in a variety of qualities, from the light sheer chiffon to the hard-falling wild silk fabric. The yard goods are available undyed from stock. We are happy to fulfill the dyeing on customer request in an OEKOTEX100 certified German dyeing mill.

Our partner for digital printing prints your design on every silk fabric - environmentally friendly without a single drop of water - with GOTS-approved ink.

Seidentraum sees itself as a partner for eco-fashion designers, environmentally conscious fashion designers, creative tailors and textile artists. The online shop www.seidentraum.biz is open to both consumers and B2B customers.

Our quality

Silk is called the queen among natural fibres. Silk combines many ideal properties: it is light and comfortable to wear and has excellent skin compatibility. Silk protects from heat in summer and from cold in winter. Clothing made of silk also has the great advantage over synthetic fibres of acting odor-resistant and extremely durable.

Our fabrics are woven from yarns derived from organic silk cultivation of tussah, eri, mulberry or muga silk spinners. Our partners in India and Cambodia are certified craft businesses.

From Meghalaya we purchase 100% hand-woven organic silk fabrics from eri silk directly from the weavers. This [project](#) by Seidentraum together with [GIZ](#) enables women in North-Eastern India to earn an income despite climate change.

Sustainability and social responsibility

- We support students through discounts and sponsorship
- We work together with the local crafts for the packaging
- At [GLS Bank](#), our money is managed sensibly and responsibly
- We send carbon neutral with DHL GoGreen and DPD totalzero
- We look for suppliers in the region for the operational needs
- We use recyclable or recycled packaging
- Our promotional material is printed on recycled paper
- Out of our socket Green Energy by the citizen's own Elektrizitätswerke Schönau ([EWS](#))
- As a gas supplier we have chosen POLARSTERN with 100% biogas
- Our websites are CO2 free hosted by STRATO in Germany
- We realize our mobility by public transport
- We use the carsharing of teilauto Leipzig
